PROFESSIONAL SUMMARY

Computer Science graduate seeking an entry-level IT Support / Technical Support / Desktop Support role. Hands-on experience with Windows Server, Active Directory, networking, and end-user troubleshooting through a self-built IT lab, plus real-world experience providing technical support and system maintenance for a live production application. Skilled in diagnosing hardware, software, and network issues, managing tickets end to end, and documenting fixes clearly for end users and teams.

TECHNICAL SKILLS

Operating Systems: Windows 10/11, Windows Server, Linux (Ubuntu), basic macOS

Active Directory & Servers: Active Directory Domain Services, Domain/User Account Management, Group Policy, Windows Authentication, IIS, Event Viewer

Networking: TCP/IP, DNS, DHCP, VLANs, Firewall Configuration, Remote Desktop Support, Network Troubleshooting

IT Support & Help Desk: Incident Resolution, Ticketing Systems, Help Desk Support, Hardware/Software Troubleshooting, Technical Documentation, End-User Support

Ticketing & Tools: Jira, Spiceworks, PowerShell, VMware, Git

Cloud: AWS Fundamentals

PROJECTS

IT Support & Systems Administration Home Lab

2025

Windows Server, Active Directory, IIS, PowerShell, Networking | VMware

- Built a Windows Server domain environment in VMware, installing Active Directory Domain Services, creating a new forest and domain (telugu.local), and verifying the domain controller and NetBIOS name.
- Created and managed domain user accounts, tested authentication using multiple username formats (DOMAIN\user and user@domain), and troubleshooted a sign-in failure by checking local security policies and Group Policy logon rights.
- Configured IIS with Windows Authentication for a domain-connected web app, and diagnosed 401/500 authentication errors by tracing the issue across IIS, Windows Authentication, and Active Directory using Event Viewer logs.
- Performed network troubleshooting (ping, Test-NetConnection, ipconfig, curl) and used PowerShell (Get-ADDomain, Get-ADUser, Get-Service, iisreset) to verify configuration and resolve issues.
- Logged and documented issues in Spiceworks, following a structured process: identify, reproduce, isolate, test, apply fix, verify, and document.

AgriAgent — Production Application Support

2025

Deployment, Monitoring & Maintenance | [Live on Play Store](#)

- Provided ongoing technical support and maintenance for a live production application used by multiple user roles (farmers, labourers, contractors, buyers), ensuring uptime and reliability.
- Monitored the system and resolved user-reported issues using an admin dashboard built for issue tracking and moderation.
- Applied security hardening measures and documented system configuration to reduce downtime and prevent unauthorized access.

JNTUH Results WhatsApp Bot — Automated Support Tool

2024

- Built and maintained an automated support tool resolving user queries such as results, CGPA, and backlog lookup in under three seconds per request.
- Monitored system performance and implemented session handling and rate limiting to ensure reliable service under concurrent user load.
- Diagnosed and resolved data-retrieval issues by tracing requests from the source portal through to the end-user response.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science

Malla Reddy Institute of Technology and Science

June 2025

- Relevant Coursework: Computer Networks, Operating Systems, Database Management Systems, Object-Oriented Programming

Class XII: Narayana Junior College | 2019 – 2021 | 90%

ACHIEVEMENTS, CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- AWS Solutions Architect Associate – Course Completion | Udemy — 2025
