Open to: IT Support / Technical Support / Desktop Support Roles

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in system deployment, troubleshooting, and end-user technical support. Skilled in Windows and Linux environments, networking fundamentals, hardware and software troubleshooting, and cloud basics. Built and deployed a live production application, with direct experience in issue diagnosis, system administration, and technical documentation. Seeking an entry-level IT Support / Technical Support role to apply and grow troubleshooting and customer-support skills in a fast-paced environment.

TECHNICAL SKILLS

Operating Systems: Windows, Linux (Ubuntu), basic macOS

Networking & Support: TCP/IP, DNS, DHCP, VLANs, Firewall Configuration, Remote Desktop Support, Troubleshooting, Incident Resolution, Ticketing Systems

Hardware & Systems: PC hardware and software installation and troubleshooting, Windows Server, Active Directory, Group Policy, System Administration basics

Cloud & Tools: AWS Fundamentals, Git, Linux CLI, Firebase

Ticketing & Collaboration: Jira, GitHub, Postman

Scripting: Python, JavaScript, Node.js

PROJECTS

Home Lab

2025

Virtualization, Windows Server, Networking, Ticketing

- Built a home lab environment with multiple virtual machines to simulate real-world IT infrastructure, including a Windows Server setup with Active Directory for user and group management, group policies, and domain-based access control.
- Configured a home network with router and switch setup, VLAN segmentation, and firewall rules to practice network isolation and security fundamentals.
- Practiced ticketing workflows in Jira and used remote desktop support tools to simulate end-to-end incident resolution, from ticket intake to remote troubleshooting and resolution.

AgriAgent

2025

Full-Stack App Deployment and Support | [Live on Play Store](#)

- Deployed and maintained a production application connecting multiple user roles including farmers, labourers, contractors, and buyers, ensuring uptime and reliability.
- Built an admin dashboard for issue monitoring, moderation, and analytics.
- Hardened system security using Helmet, CORS, and rate limiting to reduce downtime and prevent abuse.

JNTUH Results WhatsApp Bot

2024

Automated Support Tool

- Built and maintained an automated support tool resolving user queries such as results, CGPA, and backlog lookup in under three seconds per request.
- Implemented session handling and rate limiting to ensure reliable performance under concurrent load.
- Developed web scraping and parsing logic to extract and deliver accurate data from a live portal.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science

Malla Reddy Institute of Technology and Science

June 2025

- Relevant Coursework: Computer Networks, Operating Systems, Database Management Systems, Object-Oriented Programming, Software Engineering

Class XII: Narayana Junior College | 2019 – 2021 | 90%

ACHIEVEMENTS, CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- AWS Solutions Architect Associate – Course Completion | Udemy — 2025
